

M12M GPS RECEIVER LOW COST EVALUATION KIT

General Description:

The 1702D101, & 1702D201 Low-Cost Evaluation Kits are designed to support the user in evaluating the I-Lotus M12M Navigation and Timing receivers. By following the simple steps in the QuickStart Guide included in the kit the user can have a working GPS receiver system running in a matter of minutes.

The evaluation kits consist of these main components:

Synergy P/N	Description	Qty
470251D1G	Synergy Systems M12M evaluation board <i>(pictured above)</i>	1 ea
IL-GPS-0020-B	M12M navigation receiver	1 ea
- or -		
IL-GPS-0010-B	M12M timing receiver	1 ea
10001268G	Synergy Systems AR-10S GPS antenna	1 ea
10001107G	Standard 9 pin serial cable	1 ea
10001214G	International power supply kit	1 ea
10001870-1QS	Quick Start guide	1 ea

System Requirements

The SiRF Oncore software requires a PC running Windows™ 98/2K/NT/XP. The host system must have a standard serial port with a DB-9 connector for communications, or a USB to serial adaptor(not supplied). All software and documentation necessary to work with the receivers may be downloaded at any time from the Synergy Systems website.
